

H-Fax Voicemail Center

for HCL Notes, Outlook, Webmail (iNotes, Verse, Outlook on web, G Suite, Gmail, Outlook.com, Yahoo)

INSTALLATION AND CONFIGURATION INSTRUCTIONS

Requirements

Desktop platforms:	Windows, macOS, Linux
Desktop software:	Notes 11/10/9/8, Outlook, Webmail (iNotes, Verse, Outlook on the web, G Suite, Gmail, Yahoo, Outlook.com, etc.)
Server or workstation software:	HFMC OEM 6.0 for Windows
Server or workstation HW:	Fax modem, Voice fax modem
Server platforms (optional):	Windows, Linux, IBM i, AIX, Solaris
Server software (optional):	Domino 11/10/9/8

H-Fax Voicemail Center is a fax and voicemail solution. It requires the 3 modules below which can be installed on either (1) a dedicated Notes Windows workstation and a connected modem, or (2) a Domino Windows server with a connected modem. Read the installation instructions below which work best for your environment.

- H-Fax Voicemail Center Notes database
- HFMC OEM 6.0 for Windows
- ODBC dBASE driver

We recommend either of the 2 voice fax modems below. Click the bulleted links below for more information.

- [Multi-Tech Systems MT5656ZDX-V 56Kbps External Data/Fax/Voice Modem](#)
- [USRobotics 56K Internal PCI Voice Fax Modem 0727](#)

Click a link below to expand instructions.

[Installation instructions: HFMC OEM on dedicated Notes Windows workstation or Domino Windows Server](#)

[Installation instructions: ODBC on 64-bit Windows Server running Domino x64](#)

[Installation instructions: ODBC on 64-bit Windows Server running Domino x86](#)

[Installation instructions: ODBC on 32-bit Windows Server running Domino x86](#)

[Installation instructions: ODBC on dedicated Notes Windows workstation in any Domino platform environment](#)

[Installation instructions: ODBC on dedicated Notes Windows workstation to support Outlook, G Suite, Gmail, etc. POP acco...](#)

[Installation instructions: Configure profile and enable scheduler in H-Fax Voicemail Center Notes database](#)

1. Open the H-Fax Voicemail Center Notes database as seen below.

2. Click the "Edit profile" button as seen below to configure the H-Fax Voicemail Center Notes database. NOTE: If you specified a mailing list group and clicked the "Enable Scheduler" button using your Notes ID you will not receive an email notification if you are a member in this group. Notes and Domino assumes you are the sender and will not send you an email if you are also a member of the group.

Select Local, then click OK as seen below. However, if HFMC and ODBC is configured on a Windows Domino Server rather than a dedicated workstation, then choose the Domino server name.

H-Fax Voicemail Center Profile

HFMC Program Location:
Fax notification format:
Voicemail notification format:

Mailbox 0 is the default primary mailbox. All faxes will be received in mailbox 0. Fax notifications will be sent to the Mailbox 0 email address unless the Caller ID is specified below in the Caller ID Fax Routing section. Voicemail notifications will be sent if mailbox 0 or any other mailbox is configured to receive voicemail. Only 1 email address can be specified in the Email notification address fields (use Notes mailing list group if multiple addresses required).

The Caller ID Fax Routing fields are multi-value. Press the enter key to separate multiple values. The 2 fields are mapped on a 1-to-1 basis. For example, Caller ID line 1 is mapped to the email address in line 1, Caller ID line 2 is mapped to the email address in line 2, etc. The Caller ID should be entered exactly as it would appear on a Caller ID LCD display.

Mailbox	Email notification address	Notification type	Reader Security	Caller ID Fax Routing (Inbound)
0	<input type="text" value="IBM BP Operator Team"/>	<input type="text" value="DocLink"/>	<input type="text" value="No"/>	Caller ID: <input type="text" value="12125992023"/> <input type="text" value="18778489010"/> <input type="text" value="16464529944"/>
1	<input type="text" value="IBM BP Sales Team"/>	<input type="text" value="DocLink"/>	<input type="text" value="No"/>	Email notification address: <input type="text" value="IBM BP Billing team"/>
2	<input type="text" value="Derek Scott/NotesMail"/>	<input type="text" value="Attachment+DocLink"/>	<input type="text" value="Yes"/>	<input type="text" value="IBM BP Accounts Payable"/>
3	<input type="text" value="IBM BP Tech Support Team"/>	<input type="text" value="DocLink"/>	<input type="text" value="No"/>	<input type="text" value="Joel Michaels"/>

3. Click the "Enable Scheduler" button in the H-Fax Voicemail Center database using a Notes ID. If HFMC and ODBC is configured on a Windows Domino Server rather than a dedicated workstation, then the Notes ID must have unrestricted LotusScript access as specified in the Domino server document security tab.

NOTE: The scheduler (LotusScript agent) in the database is executed agent every 5 minutes which essentially integrates Notes and Domino with HFMC for Windows.

If HFMC and ODBC is configured on a Windows Domino Server rather than a dedicated workstation, then the H-Fax Voicemail Center database must reside on the same Domino server. To prevent Notes client security warning messages you must either notify your Domino administrator to sign the database design using the Domino Administrator client, or you can add "*/NotesMail" to the user's Notes client ECL with full access as seen in step "A" below.

A. Click File - Security- Security - [password] - What Others Do - Using Workstation - Add */NotesMail - Select all checkboxes - OK.

Purchase information

Prices for this product are listed on our web site. We accept all major credit cards and company checks. Additional charges apply for shipping & handling and international checks. Payment options are listed below.

1. Phone Credit Card Order: +1 212-599-2048
2. Fax Purchase Order: +1 800-839-8810
3. Online Credit Card Order: <http://www.notesmail.com/order>
4. Mail Purchase Order: See postal address below
